

PROJECT OVERVIEW:

Hoosier Line Energy, LLC ("Hoosier Line Solar") is developing a 180 megawatt (MW) solar facility on approximately 1,600 to 1,800 acres of privately-owned land in White County, Indiana. The solar energy project is expected to operate for 30+ years, providing significant economic investment to the community, a substantial property tax base for the county and schools, and generate emission-free renewable energy. Hoosier Line Solar construction started in late 2024 and will bring an influx of construction jobs into the community as construction progresses. The project is expected to begin operating in 2027.

WHY WHITE COUNTY?

Solar power produces emission-free electricity that will help Indiana meet demand for renewable energy. The site for the Hoosier Line Solar project was carefully selected due to the topography and existing utility impacts to the land, including existing high voltage transmission lines near the property.

SOLAR BENEFITS

Solar energy facilities are a beneficial, temporary, and low impact use of land. Benefits of solar projects include:

- Substantial property tax contributions which add low impact, assessed value to the region.
- Approximately 300-400 new full-time equivalent jobs during construction.
- Once operational, the solar facility is a passive use of land and will not generate substantive amounts of traffic, dust, odors, or other nuisances.
- Creates no emissions and requires limited amounts of water during operation.
- Land will be stabilized and seeded, allowing the land to regenerate and the soils to rest.
- At the end of operations, equipment is removed, and the land restored to prior use.

PUBLIC ENGAGEMENT

Hoosier Line Solar is committed to being a dedicated member of the White County community and to work hard to earn the trust of our neighbors. Our engagement with the community goes well beyond job creation, economic investment, and providing clean, renewable energy. We strive to build lasting partnerships with civic leaders, property owners, and community members. We pride ourselves on being transparent in our communication and highly responsive to public feedback throughout the life of the project. We also believe being involved means giving back. We get to know our neighbors and have a long history of supporting local causes the community is passionate about. Whether through employee volunteer opportunities or corporate-level sponsorships, we are always looking for positive ways to stay actively engaged with the community and to serve as a good corporate neighbor.

ABOUT

Hoosier Line Solar is a wholly-owned subsidiary of LRE (Leeward Renewable Energy). Founded in Texas in 2003, LRE owns and operates 31 wind, solar, and energy storage projects totaling more than 3GW nationwide. With a goal of 10GW by 2028, we prioritize domestic jobs, local community partnerships, and protecting the land in our long-term approach to meet American energy needs.
